noelfischer@gmx.ch | noel-fischer | noelfischer

Computer science student in his final semester with a bachelor's thesis in computer vision and generative AI. Joined Adnovum AG in 2018, progressing from apprentice to part-time application developer, with a focus on software engineering, agile working and international experience gained during a semester abroad in Japan.

Education

09.2022 - 06.2026

Bachelor of Science in Computer Science
ZHAW School of Engineering
- International Profile, Entrepreneurial Profile, ZHAW Innovation Challenge 1.0 Winner

09.2025 - 01.2026

Study Abroad Semester
Shibaura Institute of Technology

08.2018 - 08.2022

Apprenticeship as Computer Scientist with Technical Vocational Baccalaureate
Vocational School Winterthur
- Specialization in Application Development

Professional Experience

08.2022 - Present

Application Developer (Part-time, 50%)
Adnovum AG
- Collaboration in a Scrum and SAFe-based team on a large IT project
- Creating and managing features for databases, server-critical applications, websites and the integration and communication of these various components
- Working with technologies such as Java, Angular, TypeScript, SQL, CI/CD, SDLC

08.2018 - 08.2022

Apprenticeship as Computer Scientist
Adnovum AG
- Planning, providing and supervising trial days
- Agile work in a team on a fullstack application in Identity Management

Projects

Bachelor Thesis SketchAI
AI-based interpretation of technical drawings

- Development of a deep learning model for AI-supported interpretation of standardized technical drawings
- Literature research, dataset definition, implementation, evaluation and training on HPC infrastructure

AI Legal Document Platform
Legatiq (ZHAW × Walder Wyss)

- Built an AI legal assistant for semantic search and document summarization using LangChain, LangGraph and Azure OpenAI
- Implemented scalable RAG pipeline with PostgreSQL, Qdrant and containerized services, enabling semantic retrieval from legal PDFs

Personal Project
soundvisualiser.com

- Development of a real-time audio analysis app with React, p5.js, the Web Audio API and Firebase
- Successfully scaled to 2,000+ monthly users

IT Skills

Programming Languages	Python | Java | JavaScript/TypeScript
Software Development	SDLC | Agile/Scrum methodologies | Git | Version Control
Machine Learning / AI	TensorFlow | PyTorch | Keras | LangChain | RAG
Cloud	Docker | Kubernetes | CI/CD pipelines | AWS | Azure
Web	HTML5/CSS3 | Tailwind CSS | React | Next.js | Angular
Data & Databases	SQL | PostgreSQL | MongoDB
Backend	Node.js | FastAPI | Spring Boot | REST APIs

Certificates

2024-05-31 **Leading SAFe Certification**, Scaled Agile, Inc.
2025-08-28 **AWS Technical Certification**, Amazon Web Services
2024-10-28 **TOEFL iBT (English proficiency): 112/120, C1 Advanced**, ETS

Language Skills

German	●●●●●	Native
English	●●●●●	Fluent
French	●●○○○	Basic knowledge

Interests

In my free time, I really enjoy taking the train to go hiking in nature or exploring nearby cities. I challenge myself athletically with parkour and calisthenics. I also like to apply my passion for IT in private coding projects.
